Open Innovation
for Open Minded Entrepreneurs

Nice to meet you

- We are a team of 90 entrepreneurs / freelancers with a passion for open innovation.

- We create experimental laboratories, to prototype ideas and create user centric technoluxe and sensorial businesses.

- We specialise in IOT, M2M, Smart Labs, Smart Hotels, Student Apartments, Smart City, LORA, Smart Homes, Smart Buildings, Water Management, M2M and Smart Objects (SOO)

Our activity domains

interdisciplinary labs

MEDIA

BUSINESS

URBANISM

MECHATRONICS

FABRICATION

ART & DESIGN

IOT

SUSTAINABLE DEVELOPMENT
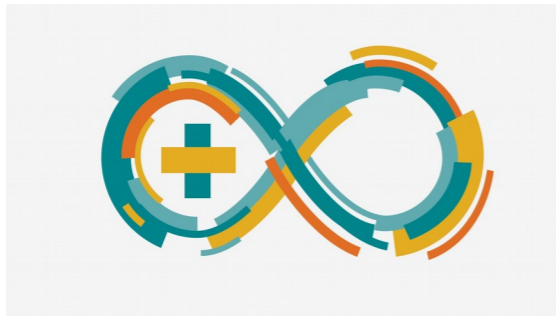

HEALTH
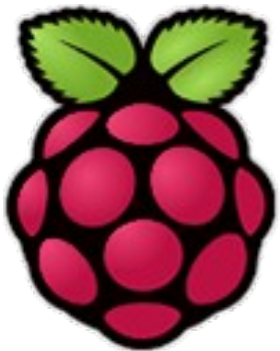

CULTURE & EDUCATION

pangloss Labs

Why SmartLab ?

- We animate eco-fablabs and living labs, to provide a shared resource for the entrepreneurial community: digital fabrication equipment and physical IOT prototyping and production runs.
- We work with the network of other open innovation spaces

pangloss
Labs

SmartLab solution

- An intelligent central point to which we can connect sensors and take actions based on their state to set up presence indications

- We can see when the lab is open and who is in it in real time.

- You can see the status on the top of our web site and on an app on your smartphone

- Temperature, dust and humidity sensors, relays.

- Wifi-enabling the matrix display

pangloss Labs

Award Winning Design

- Student Apartment / Hotel Room / Boat cabine

Smart City / LORA Gateway

- The Things Network is a global open crowdsourced IOT data network.
- The Things Network uses LoraWAN technology,
- A LoraWAN gateway at Pangloss Labs
