

Portable electricity generator.  
Able to charge various mobile devices.

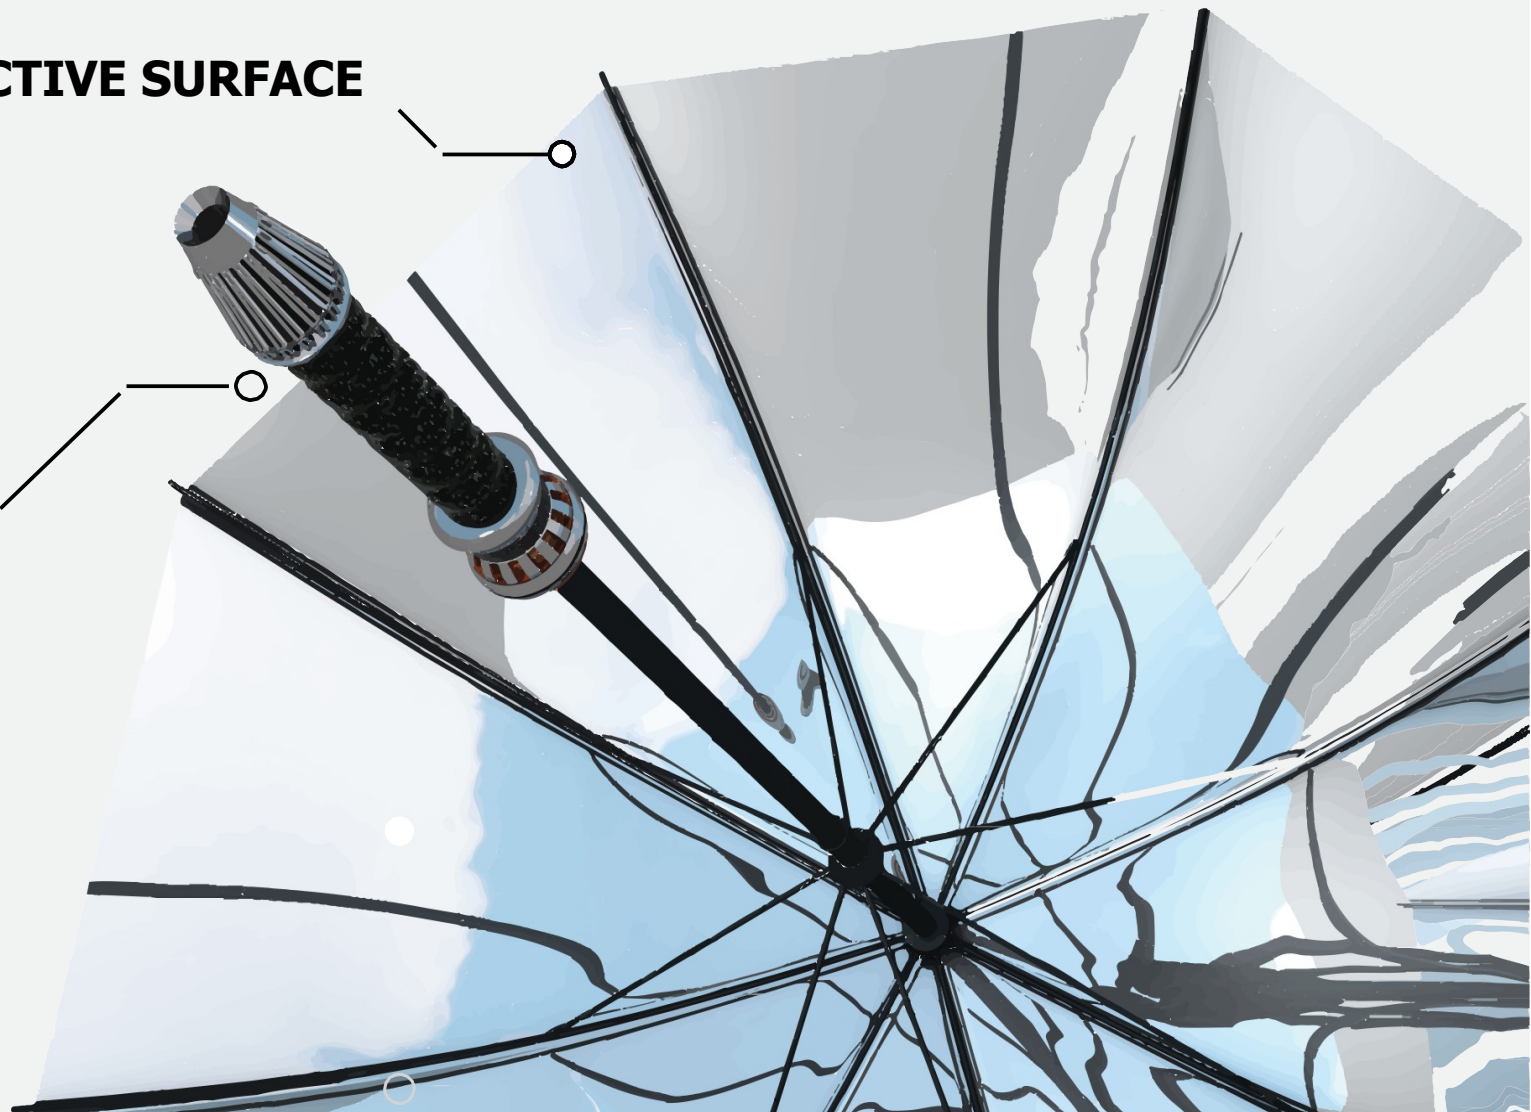

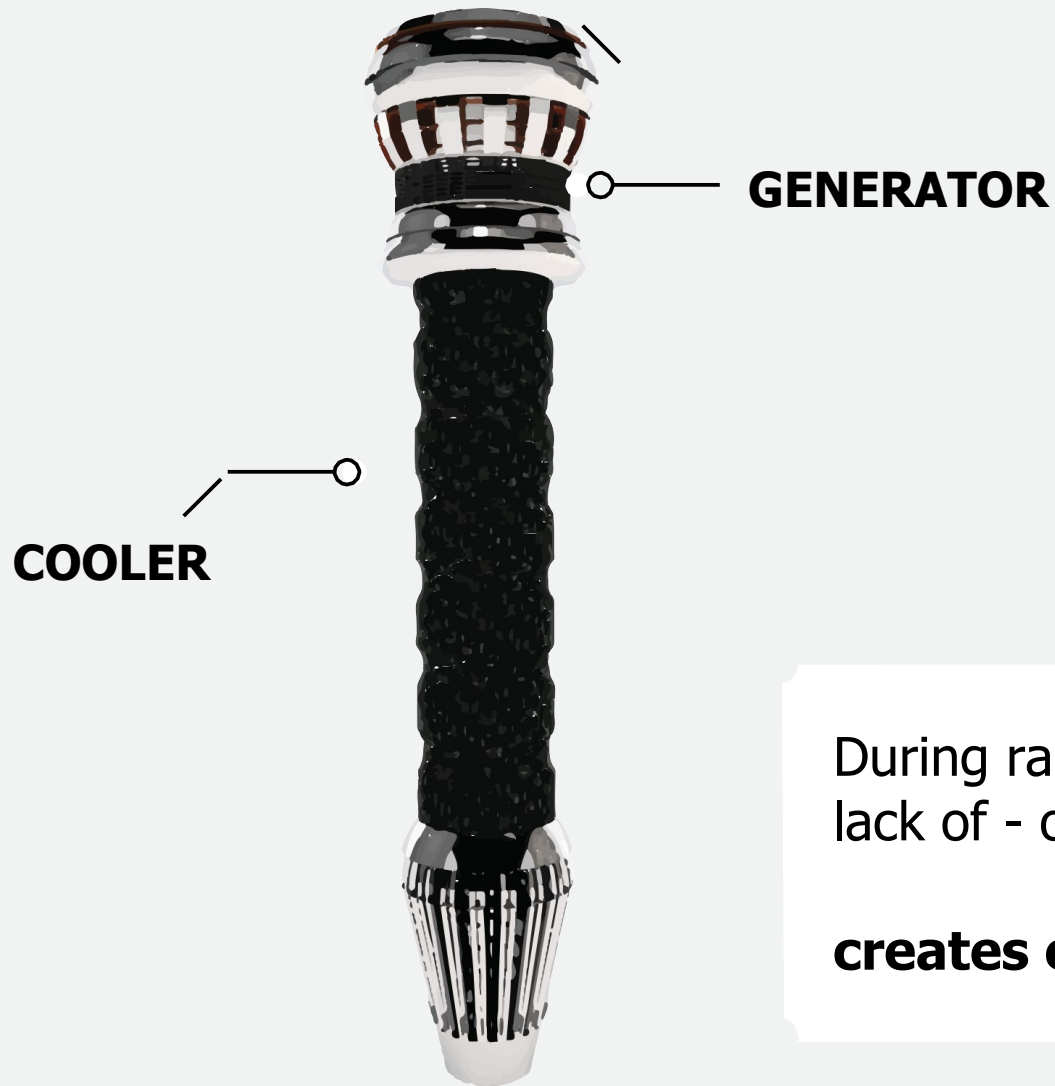

Energy within reach 24 hours a day

During sunny days:  
**converts heat from the sun into electricity**

**REFLECTIVE SURFACE**

**GENERATOR**

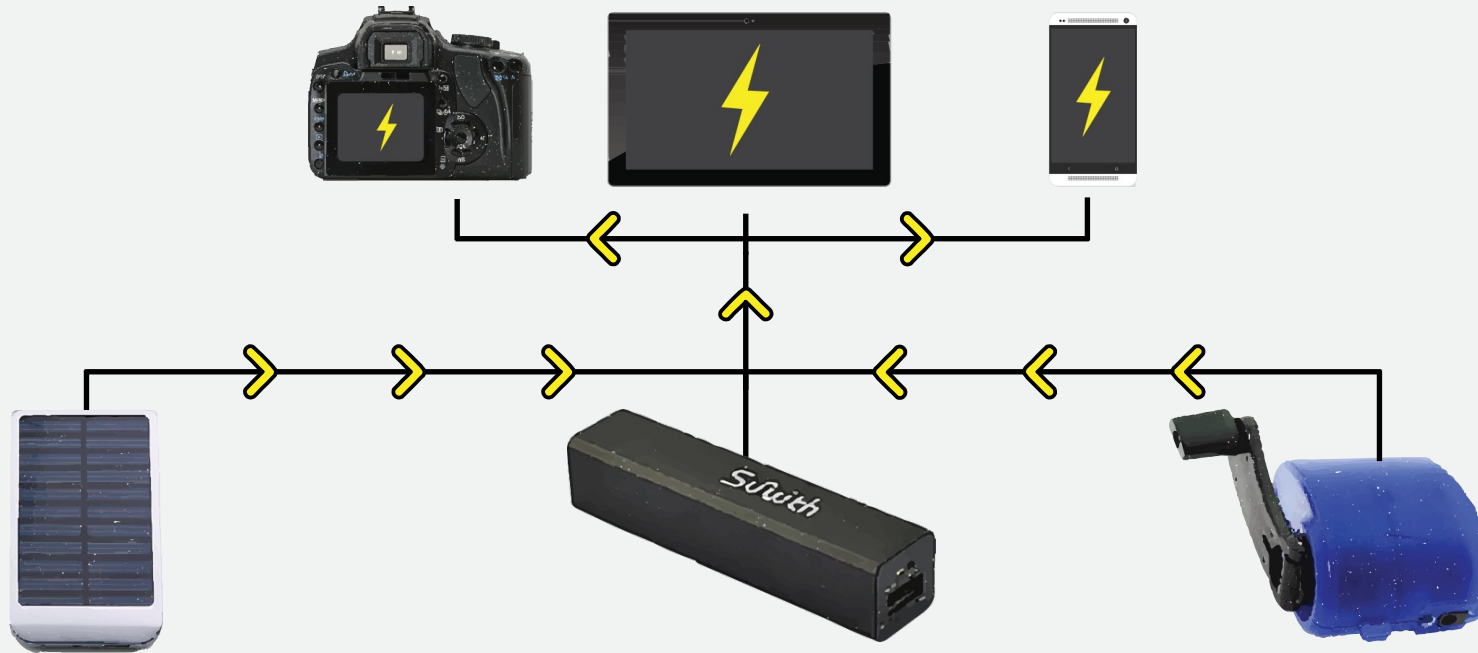

During rainy days, at night, or where there is a lack of - or no solar energy at all:

**creates electricity from any source of heat**

*charge + umbrella = Chargebrella*

**Photovoltaic chargers**

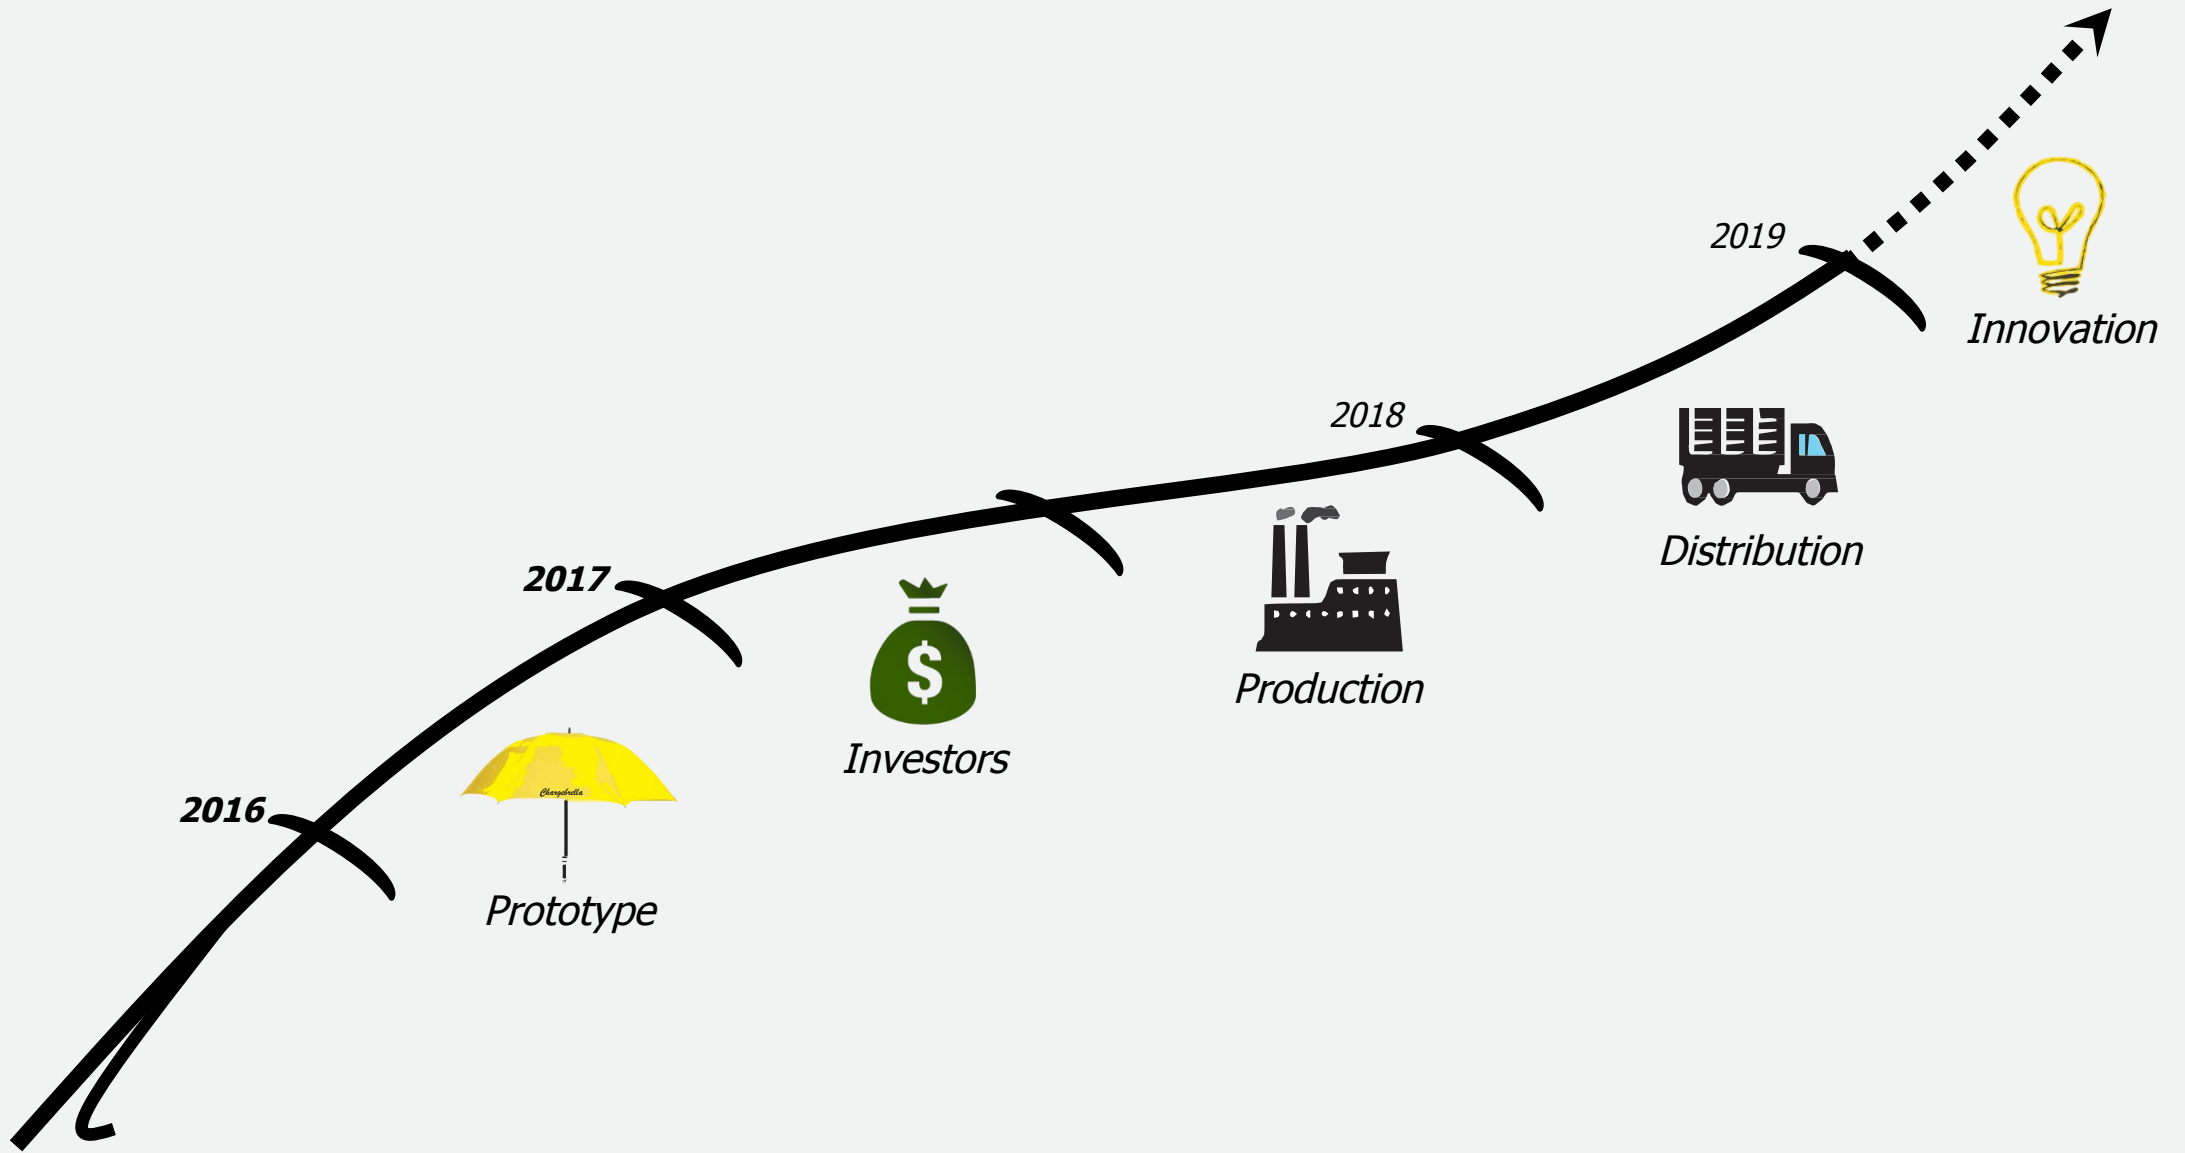

Chargebrella is able to charge **day & night.**

**Portable battery**

Chargebrella is **not dependent on external sources** of electricity.

**Dynamo chargers**

Chargebrella recharges **automatically** while you rest.
